### Government of Pakistan

# National Vocational and Technical Training Commission

# **Prime Minister's Hunarmand Pakistan Program**

"Skills for All"

### **Course Contents / Lesson Plan**

Course Title: Artificial Intelligence (Machine Learning & Deep Learning)

Duration: 3 Months

Trainer Name	
Course Title	Artificial Intelligence (Machine Learning & Deep Learning)
Objective of Course	Employable skills and hands on practice for Artificial Intelligence, including specialization in Natural Language Processing (NLP) and Microsoft Azure Al Associate
	The aim for the team of staff responsible for delivery of the advanced IT curriculum is to provide knowledge and develop skills related to the IT. The course will allow participants to gain a comprehensive understanding of all the aspects. It will also develop the participant's ability to act in a professional and responsible manner.
	Teaching staff will provide the technical knowledge and abilities required to solve tasks and problems that are goal-oriented. They will use participant-centered, practically oriented methods. They will also develop a program of practical assessment that reflects the learning outcomes stated in the curriculum. Trainees of the IT curriculum will also develop their willingness and ability as individuals to clarify issues, as well as think through and assess development opportunities.
	Teaching staff will also support trainees in developing characteristics such as self-reliance, reliability, responsibility, a sense of duty and a willingness and ability to criticize and accept criticism well and to adapt their future behavior accordingly.
	Teaching staff also use the IT curriculum to address the development of professional competence. Trainees will acquire the ability to work in a professional environment. By the end of this course, the trainees should gain the following competencies:
	Understanding of core concepts of artificial intelligence and machine learning State of the art machine learning techniques Hands-on exposure to exploratory data analysis Practical exposure to model design, evaluation Familiarity with tools and libraries such as scikit learn,

#### After taking this course, you will be familiar with the fundamentals **Learning Outcome of the** of Artificial Intelligence. You will gain practical experience in Course applying AI for problem solving, and will develop a deep understanding of the core concepts by implementing solutions to real world problems. By the end of this course, the trainees should gain the following competencies: Understanding of core concepts of artificial intelligence and machine learning State of the art machine learning techniques Hands-on exposure to exploratory data analysis Practical exposure to model design, evaluation Familiarity with tools and libraries such as scikit learn. pandas numpy, tensorflow, pytorch and keras After the specialization in NLP, you will be comfortable using TensorFlow pipelines for NLP at the end of the course. Moreover, You will learn to build your own models which will extract information from textual data. You will learn text processing fundamentals, including text normalization, stemming and lemmatization. You will learn about different evaluation metrics for models trained for NLP tasks. You will learn to make a part of speech (POS) tagging model. You will learn about named entity recognition. You will learn advanced techniques including word embeddings, deep learning (DL) techniques. You will learn how to deploy a NLP model Moreover, you will learn not only all these skills but also learn to use Microsoft Azure API for Machine and Deep Learning for numerical, image and text data. **Course Execution Plan** Total Duration of Course: 3 Months Class Hours: 4 Hours per day Theory: 20% Practical: 80% **Companies Offering Jobs** 1. Careem in the respective trade 2. Afiniti 3. Addo.ai 4. Arbisoft 5. I2c 6. Xavor 7. Fiverivers Technologies 8. Confiz 9. Crossover 10. NetSol 11. Research institutes 12. All Private Institutes who have an ML department **Job Opportunities** Al is the buzzword of the century, attracting attention across industries, motivating changes in products as well as services. It is the very nature of the subject that makes its applications

Artificial Intelligence Machine Learning

Deep Learning

in multiple domains. Whether you belong to a technical background or not, chances are that AI can make your job easier, and push it in the right direction. Dive in to develop an understanding of the core concepts, while gaining hands on experience and training from the industry's finest. Trained resources can find work as one of the following roles:

- Al Associate Engineer
- Machine Learning associate analyst
- Assistant Data Analyst
- Research Assistant

			Hour#	•	Introduction to Natural Language Processing	<ul> <li>Task 53-</li> </ul>
			2		3	55
			Hour#	•	Syntax, Semantics, Pragmatics, and	
			3	١.	Discourse	
				Ľ	NLP curves and future directions	
					a pre-processing for NLP	
					oduction to NLTK/SpaCy	D. G. H
					ise removal (stopwords, punctuation, etc)	<u>Details may be</u>
		Day 2	Hour#	•	Word and sentence tokenization	seen at
			1		Word segmentation	<u>Annexure-I</u>
				•	Stemming Tout a green dispations	
				_	Text normalization	
			Hour	•	Regular expression for string parsing	
			# 2-3		POS tagging	
			3		NER tagging Chunking and Chinking	
					Lemmatization	
					WordNet	
			Hour#	<del>-</del>	Words as features (BoW model)	-
			1 1001# 4	•	Feature Selection and Extraction	
				•	Document Similarity	
	Machine Learning I	Day 3	Hour#		Testing	1
	I Louining I	Juy 0	1		Tooming	
			Hour#	•	Evaluation Metrics	1
			2	•	Classification and Regression	
	1	1	1	1		1

		Hour • Dataset imbalance and its remedies  # 3-4 (Augmentation)	
		# 3-4 (Augmentation)  Day 4 Hour# • Support Vector Machine (SVM)	
		1,2,3	
		Hour# • Decision Tree	
		Day 5 Hour# • Decision Tree	
		Hour   Bagging – Random Forest	
		# 3-4	
		Build Your CV – Mid-term Exam	
Week 7		Day 1 Hour# • Motivational Lecture (For further detail please see Page No: 3& 4)	
		Hour# • Boosting	
		2,3,4	<ul> <li>Task 56-64</li> </ul>
	Deep Learning I	Day 2 Hour# MLP Feed Forward Neural Network	
	Deep Learning I	1,2,3, • Forward and backward passes	
		Nonlinearity: Activation functions	D = ( = '/= /= =
		Cross-Entropy	Details may be
		Computational graph and Backpropagation	n <u>seen at</u>
		Vanishing and exploding gradients	<u>Annexure-I</u>
		Overfitting, underfitting, dropout regulariza	tion
		Day 3 Hour# • Introduction and implementation of neural	
		1,2,3, networks using appropriate deep learning	API
		or orioles (Terisori 1811, 1 y Teren, 1 teras)	
		Day 4 Hour Convolutional Neural Network (CNN) # 1-2 •2D CNN for image classification	
		Hour • 1D CNN for text document classification	
		# 3-4	
		Day 5 Hour • Code Practice Neural Networks	
		# 1-2 Hour • Code Practice Neural Networks	
		# 3-4	
Week 8	Deep Learning II	Day 1 Hour#   Motivational Lecture (For further detail	
		1 please see Page No: 3& 4)	
		Hour# • Recurrent Neural Networks (RNNs) 2,3,4	
		Day 2 Hour# • Long-Short-Term-Memory Networks (LSTI	M)
		Day 3 Hour# • LSTM Code Practice	
		Day 4 Hour# • Gated Recurrent Unit Networks 1,2,3, 4

# List of Tasks

Tas	Task Title	Description	Wee
k			k
No.			
1.	Installation	Download and install Anaconda3	1
		Install PyTorch	
		Install TensorFlow 2.0	
		Install VSCode	
		Install PyCharm	
2.	Linux	Practice these commands:	1
	Command	pwd, cd, ls, cat, sudo, man, redirection, mkdir, rm, rmdir, cp, mv, file, reading, cat,	
	S	more, less, head, alias, shutdown, restart, touch, nano, bash, sh, chmod, ps, kill,	
		dpkg	
3.	Python		1
		# This program adds two numbers	
		num1 = 1.5	
		num2 = 6.3	
		num2 = 6.3	
		# Add two numbers	
		# Add two numbers	
		sum = num1 + num2	
		# Display the sum	
		<pre>print('The sum of {0} and {1} is {2}'.format(num1, num2, sum))</pre>	
		, , , , , , , , , , , , , , , , , , ,	

```
Python
4.
              # Store input numbers
              num1 = input('Enter first number: ')
              num2 = input('Enter second number: ')
              # Add two numbers
              sum = float(num1) + float(num2)
              # Display the sum
              print('The sum of {0} and {1} is {2}'.format(num1,
              num2, sum))
    Python
5.
              # Python Program to calculate the square root
              # Note: change this value for a different result
              num = 8
              # To take the input from the user
              #num = float(input('Enter a number: '))
              num_sqrt = num ** 0.5

# SUGGESTIVE FORMAT AND SEQUENCE ORDER OF MOTIVATIONAL LECTURE.

#### Mentor

Mentors are provided an observation checklist form to evaluate and share their observational feedback on how students within each team engage and collaborate in a learning environment. The checklist is provided at two different points: Once towards the end of the course. The checklists are an opportunity for mentors to share their unique perspective on group dynamics based on various team activities, gameplay sessions, pitch preparation, and other sessions, giving insights on the nature of communication and teamwork taking place and how both learning outcomes and the student experience can be improved in the future.

#### **Session-1 (Communication):**

Please find below an overview of the activities taking place Session plan that will support your delivery and an overview of this session's activity.

#### Session- 1 OVERVIEW

#### Aims and Objectives:

- To introduce the communication skills and how it will work
- Get to know mentor and team build rapport and develop a strong sense of a team
- Provide an introduction to communication skills
- Team to collaborate on an activity sheet developing their communication, teamwork, and problem-solving
- Gain an understanding of participants' own communication skills rating at the start of the program

Activity:	Participant Time	Teacher Time	Mentor Time
Intro Attend and contribute to the scheduled.			
Understand good communication skills and how it works.			
Understand what good communication skills mean			

Understand what skills are important for good communication skills		
Key learning outcomes:	Resources:	Enterprise skills developed:
<ul> <li>Understand the communication skills and how it works.</li> <li>Understand what communication skills mean</li> <li>Understand what skills are important for communication skills</li> </ul>	<ul> <li>Podium</li> <li>Projector</li> <li>Computer</li> <li>Flip Chart</li> <li>Marker</li> </ul>	Communication     Self Confidence     Teamwork

Schedule	Mentor Should do
Welcome:	Short welcome and ask the <b>Mentor</b> to introduce
5 min	him/herself.
	Provide a brief welcome to the qualification for the class.
	Note for Instructor: Throughout this session, please
	monitor the session to ensure nothing inappropriate is
	being happened.
<b>Icebreaker:</b> Start your session by delivering an icebreaker,	
10 min	enable you and your team to start to build rapport and
	create a team presentation for the tasks ahead.
	The icebreaker below should work well at introductions
	and encouraging communication, but feel free to use
	others if you think they are more appropriate. It is
	important to encourage young people to get to know
	each other and build strong team links during the first
	hour; this will help to increase their motivation and
	communication throughout the sessions.

# Introduction & Onboarding: 20mins

Provide a brief introduction of the qualification to the class and play the "Onboarding Video or Presentation". In your introduction cover the following:

- 1. Explanation of the program and structure.
- 2. How you will use your communication skills in your professional life.
- 3. Key contacts and key information e.g. role of teacher, mentor, and SEED. Policies and procedures (user agreements and "contact us" section). Everyone to go to the Group Rules tab at the top of their screen, read out the rules, and ask everyone to verbally agree. Ensure that the consequences are clear for using the platform outside of hours. (9am-8pm)
- 4. What is up next for the next 2 weeks ahead so young people know what to expect (see pages 5-7 for an overview of the challenge). Allow young people to ask any questions about the session topic.

# Team Activity Planning: 30 minutes

MENTOR: Explain to the whole team that you will now be planning how to collaborate for the first and second collaborative Team Activities that will take place outside of the session. There will not be another session until the next session so this step is required because communicating and making decisions outside of a session requires a different strategy that must be agreed upon so that everyone knows what they are doing for this activity and how.

- "IDENTIFY ENTREPRENEURS" TEAM ACTIVITY
- "BRAINSTORMING SOCIAL PROBLEMS" TEAM ACTIVITY"

As a team, collaborate on a creative brainstorm on social problems in your community. Vote on the areas

	you feel most passionate about as a team, then write down what change you would like to see happen.  Make sure the teams have the opportunity to talk about how they want to work as a team through the activities e.g. when they want to complete the activities, how to communicate, the role of the project manager, etc.  Make sure you allocate each young person a specific week that they are the project manager for the weekly activities and make a note of this.  Type up notes for their strategy if this is helpful - it can be included underneath the Team Contract.
Session Close: 5 minutes	MENTOR: Close the session with the opportunity for anyone to ask any remaining questions. Instructor: Facilitate the wrap-up of the session. A quick reminder of what is coming up next and when the next session will be.

#### **Annexure-III**

#### Success Story

Success story is a source of motivation for the trainees and can be presented in several ways/forms in a NAVTTC skill development course as under: -

- **1.** To call a passed out successful trainee of the institute. He will narrate his success story to the trainees in his own words and meet trainees as well.
- **2.** To see and listen to a recorded video/clip (5 to 7 minutes) showing a successful trainee Audio-video recording that has to cover the above-mentioned points.\*
- **3.** The teacher displays the picture of a successful trainee (name, trade, institute, organization, job, earning, etc) and narrates his/her story in the teacher's own motivational words.

#### **Annexure-IV:**

## Workplace/Institute Ethics Guide

Work ethic is a standard of conduct and values for job performance. The modern definition of what constitutes good work ethics often varies. Different businesses have different expectations. Work ethic is a belief that hard work and diligence have a moral benefit and an inherent ability, virtue, or value to strengthen character and individual abilities. It is a set of values-centered on the importance of work and manifested by determination or desire to work hard.

The following ten work ethics are defined as essential for student success:

#### 1. Attendance:

Be at work every day possible, plan your absences don't abuse leave time. Be punctual every day.

#### 2. Character:

Honesty is the single most important factor having a direct bearing on the final success of an individual, corporation, or product. Complete assigned tasks correctly and promptly. Look to improve your skills.

#### 3. Team Work:

The ability to get along with others including those you don't necessarily like. The ability to carry your weight and help others who are struggling. Recognize when to speak up with an idea and when to compromise by blend ideas together.

#### 4. Appearance:

Dress for success set your best foot forward, personal hygiene, good manner, remember that the first impression of who you are can last a lifetime

#### 5. Attitude:

Listen to suggestions and be positive, accept responsibility. If you make a mistake, admit it. Values workplace safety rules and precautions for personal and co-worker safety. Avoids unnecessary risks. Willing to learn new processes, systems, and procedures in light of changing responsibilities.

### 6. Productivity:

Do the work correctly, quality and timelines are prized. Get along with fellows, cooperation is the key to productivity. Help out whenever asked, do extra without being asked. Take pride in your work, do things the best you know-how. Eagerly focuses energy on accomplishing Artificial Intelligence Machine Learning

tasks, also referred to as demonstrating ownership. Takes pride in work. Deep Learning

#### 7. Organizational Skills:

Make an effort to improve, learn ways to better yourself. Time management; utilize time and resources to get the most out of both. Take an appropriate approach to social interactions at work. Maintains focus on work responsibilities.

#### 8. Communication:

Written communication, being able to correctly write reports and memos. Verbal communications, being able to communicate one on one or to a group.

#### 9. Cooperation:

Follow institute rules and regulations, learn and follow expectations. Get along with fellows, cooperation is the key to productivity. Able to welcome and adapt to changing work situations and the application of new or different skills.

#### 10.Respect:

Work hard, work to the best of your ability. Carry out orders, do what's asked the first time. Show respect, accept, and acknowledge an individual's talents and knowledge. Respects diversity in the workplace, including showing due respect for different perspectives, opinions, and suggestions.
